mondoo

CONTINUOUS THREAT EXPOSURE MANAGEMENT

WE DON'T JUST MEASURE EXPOSURE. WE CLOSE IT.

Mondoo runs a complete continuous threat exposure management program across your entire IT infrastructure from a single interface, covering cloud, on-prem, SaaS, endpoints, network, and AI. Most tools hand you a list and walk away. Mondoo takes every exposure through to a verified fix, and proves it closed.

WHY MONDOO?

- We ship the fix, we don't just flag it
- Agentless, easy and flexible deployment
- Cover all your infrastructure, including AI
- Consolidate existing security tools
- One platform across your entire attack surface

THE MONDOO FLOW

TURNING EXPOSURE INTO A SHIPPED FIX

01 **DETECT** → 02 **PRIORITIZE** → 03 **SHIP** → 04 **VERIFY**

Agentless discovery across cloud, code, endpoints, SaaS, network, and AI.

One mission-criticality score that cuts the noise, beyond CVSS.

Agentic remediation through the tools your teams already run.

Bi-directional syncconfirms each exposure is closed.

We don't stop at the finding. We ship the fix.

TRUSTED AROUND THE GLOBE

Deutsche Telekom · Emnify · Verily · Universal Investments · Colosseum Dental · Fortune 500

CERTIFICATIONS

CIS Secure Suite · ISO 27001 · SOC 2

KEY CAPABILITIES

Complete Coverage

Agentless discovery of vulnerabilities, misconfigurations, and exposed secrets across cloud, on-prem,SaaS, endpoints, network, and AI, from a single interface.

Agentic Remediation

Mondoo ships the fix through the tools your teams already run: Intune, Jamf, Ansible, GitHub, and Terraform. No new workflow to learn.

AI Exposure

Discover, govern, and fix shadow AI, AI agents, and MCP servers with the same engine that secures the rest of your estate.

Earned Autonomy

You approve, the AI ships. Every change is previewed before commit, with configurable thresholds you dial up as confidence grows.

Risk-Based Prioritization

Real risk scored on exposure, exploitability, compensating controls, and business impact, into one mission-criticality score. Fully customizable.

Fix Verification

Bi-directional ticketing confirms each exposure is genuinely closed, not just marked done, so your risk reduction is measured.

Continuous Compliance

Demonstrate compliance at any time with continuous monitoring and out-of-the-box templates for 300+ frameworks and CIS benchmarks.

Reporting and SLAs

Measure and show progress with one-click reports and SLAs on MTTR, remediation rates, and exposure trends. Export for further analysis.

> “I love that Mondoo doesn’t require an agent on every single asset. It was really easy to connect Mondoo to our environment and instantly start scanning.”
