Agentic Vulnerability Management

mondoo
Fix Now. Fix Forever.

1. Discover
See all assets, detect all vulnerabilities

2. Scope
Align with your business priorities

3. Prioritize
Focus on the risks that matter

4. Fix
Auto-remediation embedded into workflows

5. Report
Track security progress and compliance

AI
Agentic Vulnerability Management

We don't just tell you *what's wrong*. We actually *fix it* for you.

Eliminate vulnerabilities and policy violations with intelligent AI agents that prioritize issues by business impact, remediate at machine speed with transparent automation, and orchestrate workflows end-to-end - covering your entire IT infrastructure, including cloud, on-premises, SaaS, endpoints, network devices, and the SDLC.

We don't stop at detection. We take you to resolution.

We're not just detecting security vulnerabilities - we're **eliminating** them. Through continuous monitoring and drift prevention we make sure they actually stay fixed. This is why we call Mondoo the 'Fix Now, Fix Forever' company.

Trusted by companies around the globe:

Calligo · SIS · FVB Frankfurter Volksbank Rhein/Main · T · emnify · FORTUNE 50 · verily · Universal Investment · Colosseum Dental

Mondoo certifications

CIS SecureSuite® Membership

ISO International Organization for Standardization 27001

AICPA SOC 2 Formerly SAS 70 Reports

Key Capabilities

1 **COMPLETE COVERAGE**
Mondoo detects vulnerabilities, policy violations, and exposed secrets in your entire IT infrastructure, including on-prem, cloud, SaaS, network devices, and endpoints - all from a single interface.

2 **SECURE YOUR SDLC**
Mondoo integrates seamlessly into your SDLC, providing continuous vulnerability management, compliance enforcement, and risk mitigation across code, CI/CD and production.

3 **CENTRALIZE ALL FINDINGS**
By unifying security data, alert fatigue is reduced and data no longer needs to be manually correlated. Mondoo's central console can show prioritized findings across the board, enabling fast decision making.

4 **RISK-BASED PRIORITIZATION**
Mondoo determines the real risk of vulnerabilities by looking at service exposure, business impact, exploitability, compensating controls, and other risk factors. This risk scoring can be fully customized.

5 **CONTINUOUS COMPLIANCE**
Demonstrate compliance at any time with Mondoo's continuous compliance monitoring and out-of-the-box templates for 300+ compliance frameworks and CIS benchmarks.

**6** **FAST PATH TO REMEDIATION**
Guided remediation, code snippets, and synced integrations with ticketing systems such as Jira, Zendesk, and Azure DevOps greatly accelerates mean time to resolution.

7 **AUTONOMOUS PATCHING**
Dramatically speed up mean time to remediation (MTTR) with the automated Mondoo security pipeline leveraging Ansible, Terraform, and InTune remediation code, including versioning and rollback.

8 **REPORTING AND SLAS**
Measure and show security progress with Mondoo's one-click reports and SLAs. Export data for further analysis.

Why Mondoo?

- Single platform for entire IT infrastructure
- No third-party security tools required
- Patented AI-native security model
- Transparent patching system

"Mondoo has significantly enhanced our ability to address vulnerabilities across our IT environment with speed and precision. Thanks to Mondoo, we successfully reduced vulnerabilities by 60%."

Johann Masold, Head of IT at Colosseum Dental
